

**CLASSIFIED DOCUMENT**

**PROJECT NIGHTINGALE**

**FIELD CONTACT REPORT**

**SUBJECT: ENOUNTER WITH ASSET "WAWEL-14"**

**EVENT DATE: 2023-11-30**

**DOCUMENT CREATION DATE: 2023-09-09**

**TARGET ENTITY: POLAND**

**CLASSIFICATION LEVEL: TOP SECRET**

**MISSION PRIORITY: 1**

**ORIGINATING DIVISION: COVERT OPERATIONS**

**CASE OFFICER: NIGHTINGALE-7**

**HANDLER: SPARROWHAWK-3**

**SOURCE: WAWEL-14 (ASSET)**

**SUMMARY:**

On 2023-11-30, WAWEL-14 (Asset) met with the Case Officer (Nightingale-7) at the designated safe house in Krakow, Poland. The meeting lasted approximately 30 minutes, during which the asset provided crucial intelligence on Polish military modernization efforts. This report compares and contrasts this encounter with similar cases involving WAWEL-14, highlighting unique features and differences.

**COMPARATIVE ANALYSIS:**

WAWEL-14's performance in this meeting mirrors previous encounters, where the asset demonstrated exceptional knowledge of Polish defense industry developments. Notably, WAWEL-14's information on the Polish Navy's acquisition of advanced missile systems aligns with previous reports, although the asset claimed that the Polish military plans to deploy these systems in the Baltic Sea region, which contradicts previous intel. This discrepancy warrants further investigation, as it may indicate a shift in Polish military strategy or a miscalculation by the asset.

Similar to previous meetings, WAWEL-14 demonstrated an eagerness to cooperate and provide valuable intelligence. However, the asset's behavior and demeanor showed signs of increased nervousness, which the handler (Sparrowhawk-3) attributed to the asset's ongoing personal issues. This increased vulnerability may impact WAWEL-14's reliability and the overall effectiveness of the asset.

**ANALYTICAL INSIGHTS:**

Comparative analysis of WAWEL-14's performance in this meeting with similar cases reveals a pattern of consistent intelligence provision, albeit with some discrepancies in recent reports. The asset's increased nervousness and vulnerability may indicate a growing dependence on the asset's willingness to cooperate, necessitating a reassessment of the handler's approach and the development of contingency plans to mitigate potential risks.

### **OPERATIONAL RECOMMENDATIONS:**

1. Verify and confirm the Polish military's plans for deploying advanced missile systems in the Baltic Sea region through additional intelligence gathering and asset validation.
2. Address WAWEL-14's ongoing personal issues to maintain the asset's reliability and cooperation.
3. Review and update the asset's handler protocol to ensure effective management of the asset's vulnerability and minimize potential risks.

### **SECURITY CONCERNS:**

The handler (Sparrowhawk-3) has identified potential security concerns related to WAWEL-14's increased nervousness and vulnerability. To mitigate these risks, the handler has implemented additional security measures, including increased surveillance and contingency planning.

### **DISTRIBUTION:**

This report is classified TOP SECRET and shall be disseminated to:

- Nightingale-7 (Case Officer)
- Sparrowhawk-3 (Handler)
