

MEMORANDUM

TO: Senior Management and Board of Directors

FROM: Evelyn Reed, Head of Risk Management

SUBJECT: Critical Update: Investment Fraud Exposures and Unfolding Crisis

DATE: March 10, 2022

CONFIDENTIALITY LEVEL: Confidential

As we approach the end of Q1 2022, I am compelled to bring to your attention the escalating risks associated with the Meridian Opportunities Fund (MOF) managed by the Investment Division led by Marcus Thorne. Despite my repeated warnings (dated March 2021 and August 2021), senior leadership has chosen to downplay the severity of these issues. I am providing this urgent update to ensure that you are fully informed of the current situation and the measures required to mitigate the fallout.

SUMMARY OF FINDINGS:

- 1. Risk Assessment Scores:** Our Enterprise Risk Matrix (ERM) indicates a risk score of 92 (highly critical) for the MOF, reflecting the substantial discrepancies between reported and actual valuations.
- 2. Investment Strategy Deviations:** Analyzing the Cascade Technology Portfolio, we have identified a pattern of mispricing and synthetic collateralization, which artificially inflate the fund's value.
- 3. Unusual Transaction Patterns:** Compliance alerts have been triggered due to the presence of layering schemes, involving complex transaction chains to conceal the true nature of these investments.
- 4. Regulatory Non-Compliance:** Our analysis suggests that the bank has failed to report suspicious transactions to the Federal Banking Commission (FBC) as required by Regulation FD.

CRITICAL INCIDENTS:

- 1. Whistleblower Reports:** Junior analyst Rebecca Torres and trader Michael Voss have come forward with credible allegations of investment fraud, highlighting the bank's failure to maintain a control environment that supports compliance with regulatory requirements.
- 2. Data Breach:** We have discovered evidence of unauthorized access to sensitive client information, compromising the bank's confidentiality and potentially exposing clients to financial risks.

RECOMMENDATIONS:

1. **Immediate Investigation:** Initiate a comprehensive forensic investigation into the MOF, focusing on the Cascade Technology Portfolio and the use of synthetic collateralization.
2. **Risk Management Review:** Conduct a thorough review of our risk management framework to identify the root causes of these failures and implement corrective actions to address these weaknesses.
3. **Regulatory Compliance:** Ensure that all regulatory requirements are met, including the reporting of suspicious transactions to the FBC.
4. **Client Communication:** Develop a clear and transparent communication strategy to inform clients of the current situation and the measures being taken to address these issues.

ACTION REQUIRED:

I request an emergency meeting with the Board of Directors and senior management to discuss these findings and recommendations. It is essential that we take immediate action to mitigate the risks associated with the MOF and restore confidence in the bank's governance and risk management processes.

Please acknowledge receipt of this memo and confirm your availability for the emergency meeting.
