

## **Field Contact Report: Eyes Only**

**Document ID:** FCR-2023-12-14-001

**Event Date:** 2021-05-09

**Document Creation Date:** 2023-12-14

**Target Entity:** Warsaw Pact

**Classification Level:** Eyes Only

**Mission Priority:** 4

**Originating Division:** Signals Intelligence

**Author:** Sparrowhawk-3, Signals Specialist

### **Summary:**

On 2021-05-09, I encountered a suspicious individual at the Warsaw Pact's East Berlin Radio Broadcasting Station. The individual, later identified as asset code 'Nova-4,' displayed unusual behavior, sparking my interest in potential security breaches. This report outlines the details of our encounter, highlighting potential security concerns and intelligence implications.

**Location:** East Berlin Radio Broadcasting Station, Karl-Liebknecht-Straße 33, East Berlin, Germany

**Time:** 14:45 hours local time

I was conducting routine signals intelligence gathering at the East Berlin Radio Broadcasting Station when I noticed a person lurking around the perimeter fence. The individual, a male, approximately 30 years old, with short, dark hair and a thin build, appeared to be trying to remain inconspicuous. He wore a faded 'Radio Berlin' employee badge, which seemed out of place on his jacket.

### **Encounter:**

As I observed the individual, he caught my eye and quickly looked away, attempting to blend in with the surrounding crowd. I noticed that he was holding a small, encrypted notebook and glanced at it several times, seemingly checking a schedule or coordinates. This behavior struck me as unusual, as I have never seen anyone accessing encrypted materials in such a public area.

I decided to investigate further, keeping a safe distance to avoid detection. The individual began to stroll towards the broadcasting station's main entrance, where I noticed a group of Warsaw Pact guards on high alert. They seemed to be monitoring the area closely, possibly in response to some internal security concern.

### **Nova-4's Behavior:**

Upon closer inspection, I observed that the individual (Nova-4) was attempting to exchange a small package with one of the guards. The guard, a tall, imposing figure, seemed hesitant to accept the package, but eventually handed Nova-4 a small key. This exchange sparked my interest, as it appeared to be a clandestine meeting.

### **Initial Assessment:**

Based on the information gathered, I believe that Nova-4 may be involved in a potential security breach or espionage operation. His behavior, especially the encrypted notebook and attempted exchange with the guard, suggests a level of sophistication and intent. Further investigation is required to determine the full extent of Nova-4's activities and potential ties to the Warsaw Pact.

### **Recommendations:**

1. Conduct further surveillance on Nova-4 to gather more information about his activities and potential connections to the Warsaw Pact.
2. Attempt to intercept and decode the encrypted notebook to uncover its contents and significance.
3. Assess the possible implications of this encounter on our overall understanding of Warsaw Pact security procedures and potential vulnerabilities.

### **Conclusion:**

This encounter with Nova-4 highlights the need for continued vigilance and attention to detail in our signals intelligence gathering efforts. The potential for security breaches or espionage operations within the Warsaw Pact demands that we prioritize further investigation and analysis to protect our interests and maintain a competitive edge.

### **Distribution:**

This report will be shared with the Signals Intelligence Division, Covert Operations Division, and relevant senior personnel within the organization.

### **End of Report**

### **Document Control:**

This report has been reviewed and approved by:

- Sparrowhawk-3, Signals Specialist (Author)
- Nightingale-7, Senior Case Officer (Reviewer)
- Shadow-12, Technical Operations (Reviewer)

**Document Classification:**

Eyes Only

**Document Storage:**

This report will be stored in the Central Personnel Archive, Document Control System DCS-9, with access restricted to authorized personnel.

**Report Endorsement:**

This report is endorsed by the author, Sparrowhawk-3, and approved by the reviewers, Nightingale-7 and Shadow-12.
