

## Field Contact Report

**Document ID:** FCR-21-007

**Date:** 2021-10-07

**Creation Date:** 2021-10-07

**Event Date:** 2020-02-23

**Classification Level:** Top Secret

**Mission Priority:** 4

**Originating Division:** Human Intelligence

**Target Entity:** East Germany

**Agent ID:** Nightingale-12

**Handler:** Sparrowhawk-3

**Location:** Dresden, East Germany

**Meeting Type:** Live Drop

### Summary:

This field contact report details a meeting with asset Nightingale-12 on 2020-02-23, where he provided information on East German industrial espionage activities. Comparison with previous reports reveals a unique aspect of this meeting: the asset's concern about a potential mole within his network.

### Meeting Details:

Nightingale-12, a trusted source within the East German industrial sector, met with Handler Sparrowhawk-3 in a secure location in Dresden. The meeting lasted for 45 minutes and produced valuable intelligence on East German espionage activities.

### Intelligence:

1. **Industrial Espionage:** Nightingale-12 reported on a recent East German attempt to acquire advanced manufacturing technology from a Western European company. This attempt was thwarted by a Western intelligence agency, which compromised the East German operation.
2. **Mole Concerns:** Nightingale-12 expressed concern about a potential mole within his network, citing suspicious behavior from a colleague. This concern is unique to this meeting and warrants further investigation.
3. **Counterintelligence:** Nightingale-12 provided information on East German counterintelligence efforts, including their use of deception tactics to identify and recruit Western assets.

## **Comparison with Similar Cases:**

1. **Similarity to FCR-20-005:** The meeting with Nightingale-12 bears some resemblance to FCR-20-005, where an asset reported on East German espionage activities in the automotive sector. However, the mole concern in this report is a new development that requires further investigation.
2. **Differences from FCR-20-008:** Unlike FCR-20-008, which focused on East German military intelligence activities, this report details industrial espionage and counterintelligence efforts.

## **Analytical Insights:**

1. **Mole Concerns:** The mole concern in this report highlights the potential for compromised assets within the East German industrial sector. Further investigation is necessary to determine the extent of this compromise.
2. **Counterintelligence Efforts:** The information provided by Nightingale-12 on East German counterintelligence efforts suggests that the East Germans are actively working to identify and recruit Western assets.

## **Recommendations:**

1. **Investigate Mole Concerns:** Further investigation is necessary to determine the extent of the mole concern within the East German industrial sector.
2. **Monitor Counterintelligence Efforts:** Continued monitoring of East German counterintelligence efforts is necessary to understand their strategy and tactics.

## **Distribution:**

This report is classified Top Secret and is intended for distribution to the following personnel:

1. **Sparrowhawk-3:** Handler for Nightingale-12
2. **Research & Analysis Division:** For analysis and strategic assessment
3. **Counterintelligence Division:** For investigation and compromise mitigation

## **End of Report**
